Working directly with the end user, our Training Team will assist **YOU** in the development and implementation of the most comprehensive operator training program for your **TEAMMATES!**

OUR SYSTEM

Training – Operator and Train-The-Trainer Programs available, all initial training programs are instructor led to ensure the best results.

Evaluation – Conduct a Pre-Training Site Safety Assessment to identify the training needs. Prior to training development and implementation Management approval is required.

Analysis – Post-Training analysis provides key information for structuring continued improvement programs, safety meetings, and refresher training topics, etc.

Motivation –Through our Team Concept, allow designated company teammates to participate in the development and implementation of your material handling training programs.

IT'S AN INVESTMENT,
NOT A COST.
